

Empowering Government Agencies to Optimize Their IT Estate

Optimize IT spend, manage risk, and ensure compliance.

Secure IT Asset Control.

We help agencies gain control of their IT estate with expert support to streamline licensing, reduce waste, and ensure compliance with government regulations, all while safeguarding the sensitive data citizens trust you to protect. From procurement and deployment to renewals and decommissioning, Anglepoint manages every aspect of your IT lifecycle, securing seamless operations and maximizing the value of your software investments and compliance at each stage.

COMMON CHALLENGES WE ADDRESS:

Overspending on software, underutilized licenses, and SaaS sprawl

Managing software renewals and subscriptions

Inaccurate entitlement data and license tracking

Uncertainty around **SaaS and Cloud** licensing models

Complex licensing models across multiple products and publishers

Unexpected costs from non-compliant software use
