

ITAM Workshops for Public Sector Agencies

Align stakeholders, eliminate waste, and build lasting ITAM maturity.

Anglepoint's ITAM workshops bring stakeholders together to align on priorities, maturity, clarify accountability, and define a practical roadmap. These sessions can be delivered in-person, or virtually by experienced public sector advisors.

ITAM WORKSHOP OUTCOMES

Gain Crucial Insights:

- Align stakeholders on the **current-state reality** of the environment, not assumptions
- Identify the **highest-impact optimization opportunities** across tools, licenses, and usage patterns
- Highlight where process, ownership, or reporting gaps are creating **avoidable cost and disruption**

Trim Organizational Waste:

- Identify waste from **unused licenses, duplicate tools, over-allocation, and low adoption**
- Reduce spend leakage by improving how teams manage **renewals, entitlements, and contract scope**
- Pinpoint process friction and inefficiencies that cause **rework, delays, and inconsistent outcomes**

Build Real Knowledge:

- Provide practical guidance to help teams **understand licensing + governance requirements** in plain language
- Define "what good looks like" through **repeatable frameworks** for ITAM maturity and accountability
- Train stakeholders to recognize **risk signals and cost drivers** before they become urgent problems
