

Software Licensing Entitlement Assessment for Public Sector

A fixed-price, rapid assessment that uncovers waste, risk, and savings across your software estate.

**ONE-TIME
LOW-COST**

Public Sector agencies are under growing pressure to justify software spend and reduce waste. In response, Anglepoint now offers SLEA: a one-time, low-cost, fixed-price service that analyzes an agency's software estate and delivers a clear, data-backed report.

DELIVERABLES

Data Visualization

- Software Inventory & Spend Overview
- Functional Overlap Mapping
- Surplus License Identification
- Cost Savings Opportunities

Optimization Report

Prioritized recommendations with savings estimates and next steps.

Executive Brief

Clear leadership summary of findings, risks, and savings.

Closure Meeting

Walk through recommendations and agree on next steps.

METHODOLOGY

PHASE

1

Centralize the Data:

Centralize IT assets before assessing compliance readiness. This allows federal agencies to consolidate data and prioritize vendors and publishers within their software estates.

PHASE

2

Identify Risks:

Waste: License discrepancies and poor contract management

Fraud: Compliance issues and security vulnerabilities

Abuse: Overpayments to vendors and any resulting surprise audits

PHASE

3

Assessment:

Anglepoint provides the SLEA report outlining opportunities to increase efficiency and eliminate unapproved installations. The report provides recommendations to optimize software portfolios by identifying redundant applications and unused licenses.

Real Experts. Remarkable Results.

These results are based on aggregated Anglepoint client outcomes from 2021-2025.
